

EDUCATION

Bachelor of Technology (Computer Engineering)

Expected June 2027

Sardar Patel Institute of Technology

Mumbai, MH

CORE SUBJECTS: Financial and Strategic Management, Economics, Business Strategy, Finance and Accounting, Communication and Ethics

PROJECTS

1. Strategic Management Case Study (Academic Project)

Studied a real-world company's business model and evaluated how it competes in the market.

Used SWOT Analysis (Strengths, Weaknesses, Opportunities, Threats) and Porter's Five Forces framework to assess market position and competition.

Proposed practical strategies for improving the company's performance and growth.

This project strengthened my understanding of business decision-making, competitive advantage, and corporate strategy.

2. Financial Fundamentals Simulation (Coursework)

Created a sample balance sheet and income statement for a hypothetical business scenario as part of my finance coursework.

Applied accounting principles such as debit and credit entries, asset and liability balancing, and expense tracking.

This exercise helped me understand the financial structure of a company and how to analyze profit, loss, and cash flow in real terms.

SKILLS

- Financial Literacy (Balance Sheet, Debit–Credit Fundamentals)
- Business and Strategic Management
- Economics and Decision-Making
- Analytical Thinking & Problem Solving
- Communication & Team Collaboration
- MS Excel, Google Sheets, Presentation Skills

EXTRA-CURRICULAR ACTIVITIES & ACHIEVEMENTS

- Participated in technical hackathons and workshops, developing problem-solving and collaboration skills that are transferable to management and finance roles.
- Active learner of finance and management concepts through online resources such as YouTube lectures, LinkedIn Learning, and self-study materials to build a stronger foundation beyond coursework.

To apply my analytical mindset, management interest, and growing knowledge of finance to contribute to organizational decision-making and strategy.

I aim to explore opportunities in finance, business operations, or strategic management where I can combine my technical background with my interest in business problem-solving.
